Objective

- To seek a position in life to utilize my skills and abilities and achieve professional growth while being resourceful, innovative, and flexible.

Experience

IT SPECIALIST INTERN | MIYENS | FEB 2022 – MAY 2022

- I learned how to make a couple of web pages using WordPress, do maintenance with other tasks and so much more, it's kind of sad to think there is no major code-related task in our training, but I am very happy that I made it through.
- Experience working with a team, making simple web pages for clients that are in need. Specifically, we are making documentation web pages for clients about the Miyens' Technologies including how to use them, and more information about them.

Education

JOSE RIZAL UNIVERSITY (2018-2022)

- Bachelor of Science in Information Technology (*Cum Laude*)

JOSE RIZAL UNIVERSITY (2016-2018)

- Computer System Servicing

Skills

PROGRAMMING:

- Kotlin – Java

INTERESTS:

- Android Development

Certificates

- CompTIA IT Fundamentals – 2018
- MTA Introduction to Programming using Java – 2019

Projects

EXPRESSO

- Espresso is an Android application created by Java that provides a friendly interface and uses machine learning to help students learn OOP using Java as a tool.
- Espresso is our capstone project. I was assigned to make the Android application itself. I used Java and Php for the fetching of data. Material Design for the built-in interfaces, and Volley library to send and

receive data. Other APIs were used such as the Youtube Player API since our application is capable of giving students some video tutorials.

CARKILAHAN

- Carkilahan is an Android application created by Java and used Firebase for the backend side, which provides a friendly interface that helps users to book their ride for their journey.
- This is my first application ever built, and also our mini-project in our Technopreneurship subject. I used Java in making the application itself, and Firebase for some authentication and database management.
