EDUCATION

Jose Rizal University

Bachelor of Science in Information Technology — Cum Laude

EXPERIENCE

SOFTWARE ENGINEER

Infor | Aug 2025 – Present

- Software Engineer on the MSCM Android Team, contributing to the development, enhancement, and maintenance of enterprise-scale mobile applications.
- Collaborate with cross-functional teams, senior engineers, QA, and product stakeholders to deliver reliable, scalable, and high-quality solutions.
- Contribute to architectural discussions, code reviews, and continuous improvement initiatives to strengthen code quality and system stability.
- Continuously refine software design practices and technical expertise through hands-on development and peer collaboration.

ASSOCIATE SOFTWARE ENGINEER

Infor | Aug 2022 – Aug 2025

- Contributed to the development and maintenance of both native Android and hybrid enterprise mobile applications supporting critical MSCM business operations.
- Developed and enhanced a native Android application using Java, implementing MVVM architecture to ensure scalability, separation of concerns, and improved testability.
- Applied strong object-oriented programming (OOP) principles and established design patterns to build clean, modular, and maintainable code.
- Integrated and maintained RESTful APIs to enable secure and efficient backend communication.
- Maintained and enhanced a hybrid mobile application (Ionic / Cordova) aligned with feature parity to the native Android version.
- Applied MVC architecture to structure application logic effectively and improve maintainability.
- Integrated SOAP-based web services to support enterprise data exchange.
- Collaborated closely with backend engineers, QA, and product teams to deliver features, troubleshoot production issues, and ensure application reliability.
- Participated in code reviews, debugging, and refactoring efforts to continuously improve code quality and long-term maintainability.

IT SPECIALIST INTERN

Miyens | Feb 2022 – May 2022

- Assisted in building and maintaining company web pages using WordPress.
- Designed basic UI/UX components to support internal initiatives.
- Provided IT support and assisted with system maintenance tasks.
- Gained foundational experience in professional collaboration and structured development processes.

PROJECTS

CARKILAHAN — Academic Mini Project

Android Application | Java, Firebase

- Built a ride-booking Android application as part of a Technopreneurship course.
- Developed application logic using Java and implemented backend services using Firebase.
- Used Firebase Authentication and Realtime Database / Firestore for user management and data storage.
- Focused on building a user-friendly interface and core booking functionality.
- First end-to-end mobile application, strengthening foundational Android development skills.

EXPRESSO — Capstone Project

Android Application | Java

- Developed an Android learning application designed to help students understand Object-Oriented Programming (OOP) concepts using Java.
- Built the Android application using Java and Material Design for a clean, intuitive user interface.
- Implemented PHP-based APIs for data fetching and integrated the Volley library for network communication.
- Integrated YouTube Player API to provide in-app video tutorials, enhancing the learning experience.
- Collaborated with the team to deliver a functional, student-focused educational tool.

PUMP — Personal / Ongoing Project

Full-Stack Mobile & Backend System | Flutter, Java Spring

- Designing and developing a full-stack application using Flutter for the mobile frontend and Java Spring for backend services. A fitness-focused social and coaching platform that connects clients and coaches for communication, workout planning, and progress tracking.
- Currently implementing a microservices architecture, with services containerized using Docker.
- Setting up service-to-service communication and environment configuration for scalable deployment.
- Planning to orchestrate services using Kubernetes once inter-service communication is fully stabilized.
- The project focused on learning cloud-native architecture, containerization, and distributed systems.

CERTIFICATIONS

- CompTIA IT Fundamentals — 2018
- MTA: Introduction to Programming Using Java — 2019
- AWS Academy Graduate - AWS Academy Cloud Foundations — 2022

SKILLS

Languages: Java, Dart, JavaScript

Mobile & Frontend Development: Native Android (Java), Flutter, Ionic (Cordova), React.js

Backend & Architecture: Spring Boot, RESTful APIs, MVVM, MVC

Databases: MongoDB, SQLite (Room)

Tools & Platforms: Git, Docker, Kubernetes, Firebase, Jira
