OBJECTIVE

- To apply hands-on experience and strong technical expertise to design and deliver efficient, scalable software solutions.
-

EXPERIENCE

SOFTWARE ENGINEER

Infor | Aug 2025 – Present

- Software Engineer on the **MSCM Android Team**, contributing to the development and maintenance of enterprise-scale mobile applications.
- Collaborate with cross-functional teams and senior engineers to deliver reliable, scalable, and maintainable solutions.
- Continuously improve technical skills and software design practices through hands-on development and peer mentorship.

ASSOCIATE SOFTWARE ENGINEER

Infor | Aug 2022 – Aug 2025

Android Development (Java)

- Developed and maintained a **native Android application** using **Java**, supporting core business functionality.
- Implemented **MVVM architecture**, ensuring clear separation of concerns and improved code maintainability.
- Strengthened **object-oriented programming (OOP)** practices by adhering to clean code principles and proper design patterns.
- Improved code readability and long-term maintainability through consistent naming conventions and structured process flow.
- Integrated and maintained RESTful APIs for data communication.

Technologies & Tools:

- Java, MVVM Architecture
- REST APIs
- Room Database, SharedPreferences
- Jackson, Apache Commons

Hybrid Mobile Development (JavaScript – Ionic / Cordova)

- Maintained a **hybrid mobile application** with feature parity to the native Android version.
- Applied **MVC architecture** to organize code and manage application logic effectively.
- Enhanced code structure to improve maintainability for long-term development.
- Worked with **SOAP-based services** for data integration.

Technologies & Tools:

- JavaScript, Ionic, Cordova
- SOAP
- SQLite, Local Storage

Collaboration & Project Management:

- **GitLab** for version control, code reviews, and collaborative development.
- **Jira** for task tracking, sprint planning, and workflow management.

IT SPECIALIST INTERN

Miyens | Feb 2022 – May 2022

- Assisted in building and maintaining company web pages using **WordPress**.
 - Designed basic **UI/UX components** to support internal projects.
 - Provided IT support and assisted with system maintenance tasks.
 - Gained foundational experience in professional work environments and cross-team collaboration.
-

EDUCATION

- **Jose Rizal University** 2018 - 2022
 - **Bachelor of Science in Information Technology** — *Cum Laude*
 - **Jose Rizal University** | 2016 – 2018
 - **Computer System Servicing**
-

SKILLS

Programming Languages:

- Java
- JavaScript
- Dart (Working Knowledge)

Mobile & Application Development:

- Android Development
- Java, Kotlin

Backend & Architecture (Working Knowledge):

- Java Spring (Microservices)
- REST APIs

Tools & Platforms:

- Git, GitLab
 - Docker
 - Firebase
-

CERTIFICATIONS

- **CompTIA IT Fundamentals** — 2018
 - **MTA: Introduction to Programming Using Java** — 2019
 - **AWS Academy Graduate - AWS Academy Cloud Foundations** — 2022
-

PROJECTS

EXPRESSO — *Capstone Project*

Android Application | Java

- Developed an Android learning application designed to help students understand **Object-Oriented Programming (OOP)** concepts using Java.
 - Built the Android application using **Java** and **Material Design** for a clean, intuitive user interface.
 - Implemented **PHP-based APIs** for data fetching and integrated the **Volley library** for network communication.
 - Integrated **YouTube Player API** to provide in-app video tutorials, enhancing the learning experience.
 - Collaborated with the team to deliver a functional, student-focused educational tool.
-

CARKILAHAN — *Academic Mini Project*

Android Application | Java, Firebase

- Built a ride-booking Android application as part of a **Technopreneurship course**.
 - Developed application logic using **Java** and implemented backend services using **Firebase**.
 - Used Firebase Authentication and Realtime Database / Firestore for user management and data storage.
 - Focused on building a user-friendly interface and core booking functionality.
 - First end-to-end mobile application, strengthening foundational Android development skills.
-

PUMP — *Personal / Ongoing Project*

Full-Stack Mobile & Backend System | Flutter, Java Spring

- Designing and developing a **full-stack application** using **Flutter** for the mobile frontend and **Java Spring** for backend services. A fitness-focused social and coaching platform that connects clients and coaches for communication, workout planning, and progress tracking.
 - Currently implementing a **microservices architecture**, with services containerized using **Docker**.
 - Setting up service-to-service communication and environment configuration for scalable deployment.
 - Planning to orchestrate services using **Kubernetes** once inter-service communication is fully stabilized.
 - The project focused on learning **cloud-native architecture, containerization, and distributed systems**.
-

INTERESTS

- Android Development
- Full Stack Development
