Objective

- To seek a position in life to utilize my skills and abilities and achieve professional growth while being resourceful, innovative, and flexible.

Experience

SOFTWARE ENGINEER, ASSOCIATE | AUG 2022 – PRESENT

- Currently working as an Associate Software Engineer at Infor, and part of the MSCM Android Team. Grateful working with great people that helps me strive to learn more about Software Development. Currently exposed to languages such as Java and Javascript in maintaining applications. Currently using Jira as our platform in monitoring of tasks.

IT SPECIALIST INTERN | MIYENS | FEB 2022 – MAY 2022

- I learned how to make a couple of web pages using WordPress. First experience to work with a team, making simple web pages for clients that are in need of websites with great design and functionality. No major code-related tasks but I am very happy that I made it through.

Education

JOSE RIZAL UNIVERSITY (2018-2022)

- Bachelor of Science in Information Technology (*Cum Laude*)

JOSE RIZAL UNIVERSITY (2016-2018)

- Computer System Servicing

Skills

PROGRAMMING:

- Java – I am an average Java Developer and currently still learning it as the team use it to provide maintenance to applications. Extending the knowledge I gain from learning Java in school is one of the great phases that I am currently still at.
- Kotlin – I have a minor knowledge in using Kotlin, I have tried making a simple application using Jetpack Compose with proper architecture and coding principles.
- React JS – I have a basic knowledge in doing UI using React JS, basic knowledge using CSS and basic implementation of functionalities. I only usually use React for doing portfolio and any other projects with great UI but minimal features.

INTERESTS:

- Android Development

Certificates

- CompTIA IT Fundamentals – 2018
- MTA Introduction to Programming using Java – 2019

Projects

EXPRESSO

- Espresso is an Android application created by Java that provides a friendly interface and uses machine learning to help students learn OOP using Java as a tool.
- Espresso is our capstone project. I was assigned to make the Android application. I used Java for the interface and PHP for the fetching of data. I also used third-party libraries such as Material Design for the built-in interfaces, and Volley library for sending HTTP requests.

receive data. Other APIs were used such as the Youtube Player API since our application is capable of giving students some video tutorials.

CARKILAHAN

- Carkilahan is an Android application created by Java and used Firebase for the backend side, which provides a friendly interface that helps users to book their ride for their journey.
- This is my first application ever built, and also our mini-project in our Technopreneurship subject. I used Java in making the application itself, and Firebase for some authentication and database management.
